Champaign, IL 61821

Dear Jamie:

As the founder of the Moon Walk program, PALM would like to formally invite the University of Illinois Extension – Champaign County to participate in our Moon Walk 2010 Challenge. We are thrilled that your community continues to be excited about improving community health by participating in this event.

Last year, Quad Cities Health Initiative emerged as the 2009 winner and now holds the coveted Moon Walk Walking Stick. We hope to continue this friendly competition with the University of Illinois Extension – Champaign County and the Quad Cities Health Initiative. This will be an exciting three-way “Moon Walk Challenge”.

This year’s challenge will be the community that has logged 238,700 miles (one trip to the moon) and has the highest average miles per walker. The 8-week event officially begins on April 16<sup>th</sup> and ends on June 11<sup>th</sup>. The winner will be declared June 16<sup>th</sup> and will claim the Moon Walk Walking Stick.

We look forward to another exciting and challenging race to improve individual and community health through the benefits of walking.

To the moon!
